TECHNOLOGIES

ATTIX 9

wet and dry vacuum cleaner *

Dual Motor Power

Twin motors provide quick, powerful and productive cleaning.

One Piece Rigid Stainless Steel Construction

Large stainless steel tank improves productivity and ensures operation in the toughest cleaning environment. Emptying is kept to a minimum and provides excellent protection from knocks and bumps to ensure a longer working life for the unit.

Silent Operation

The low working noise level makes this machine the quietest in its class. A luxury feature for a comfortable working environment.

PET Coated Filter

Suitable for wet and dry without the need for change. Made from a PET material making it virtually indestructible. 99.95% efficient, keeping the dust inside the vacuum where it belongs!

Superior suction performance

The twin turbine motor produces enough air flow and suction power to give you a better result in less time.

ATTIX 961-01

ATTIX 963-21 ED

Push&Clean Filter Cleaning (ATTIX 961-01 only)

When you block the fitting for the air inlet or the hose and push the filter cleaning button, the surrounding air enters the container, passes through the filter cartridge in the opposite direction. The dirt is blasted off the filter and the suction performance is high once more.

Sit Down Tank Emptying (SD model)

No need to remove the motor heads for emptying the tank. A lever simply lowers and detaches the tank, so it can be rolled away for emptying.

ED Model (Easy Disposal)

This is a dry only model where the waste is dumped directly into a sturdy disposal bag rather than a container.

EC Drive System (965 -21 EC version)

Brushless, ignition source free single phase EC motor that is electronically regulated for precise power control. In fact the EC drive motor delivers nearly 6% higher air flow than a universal motor for the same energy cost.

- extended life time
- No sparks or carbon dust from the motor

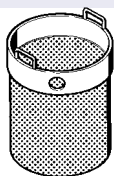

* ATTIX 9-63 21 ED is a dry vacuum only

230 & 110 volt versions available on ATTIX 961-01, all other models 230 volt only.

OPTIONAL ACCESSORIES (see product catalogue for further accessories)

Metal Chip Basket

Collects large debris when wet vacuuming - 302001612 (SD) / 302003003 (Other models)

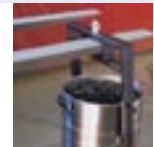

Airbox (for -21 models)

When connected to the Auto On/Off receptacle on the vacuum, and to a pneumatic tool. The airbox turns the machine on/off automatically with the tool. - 302001192/302001474

Accessory Basket

Keeps all accessories close to hand, clips onto machine.

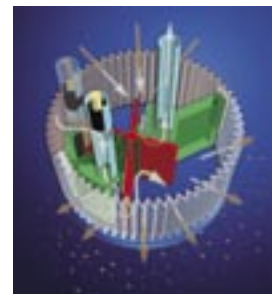

Forklift Disposal Device

For use with the SD version. The container can be fork lifted to the skip/bin and the contents disposed of.

FILTER CLEANING SYSTEM

XtremeClean
Filter Cleaning System

The XtremeClean technology is based on a valve controlled principle, using the air flow to clean one half of the filter cartridge - despite still working with the other half. The dirt is blasted off the filter and the suction performance is always maintained.
