

Diesel powered hot water high pressure washers

Diesel powered stationary heating for maximum efficiency in the automotive, industrial and shipping sectors where the cleaning is always made at one particular site indoors - or where the machine should be kept in a technical room away from the cleaning site with pressurized water transported by pipeline or long hose.

The SH SOLAR D line is equipped with the well known EcoPower boiler with an efficiency of >92% combined with a high heating effect. This brings you hotter water at the lowest possible cost. At a setting of 60°C, the boiler will be in Eco mode, consuming less fuel and offering lower temperatures. At full power, the boiler offers significantly hotter water, thus reducing cleaning time for tasks involving oils, and greases. The clean burning also reduces service costs.

The SH SOLAR D is an easy to use unit with simple control panel on the machine and possibility to activate from a distance.

The integrated PLC enables machines to be personalised with a range of factory mounted options.

- Expandable control technology with PLC and special options
- Automatic diagnosis and fault finding
- High efficiency, low cost heating system with EcoPower boiler system
- Galvanised steel frame and cabinet
- Reduced running and service costs
- Compact and easy to install
